MINISALT®

- Pool Treatment by saltwater chlorination
- Compact and water resistant
- Your way to great savings

The natural care for clear water

MINISALT®

Saltwater chlorination

The natural care for clear water

Designed for pools up to 70 m³, **MINISALT®** produces a powerful and effective disinfectant by saltwater chlorination. This keeps you free of chemical disinfectants throughout the swimming season.

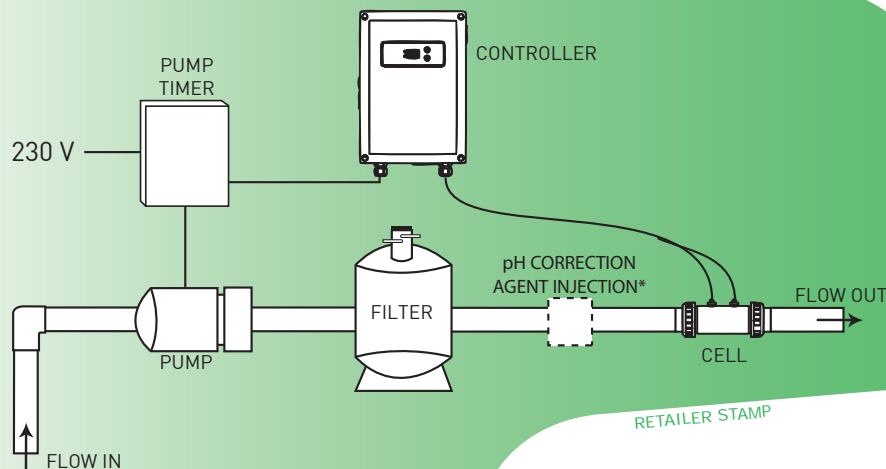

From lightly salted water as 5 kg per m³ (1/7th as much as ocean water) **MINISALT®** manages the cleanliness of your pool entirely on its own.

The disinfectant production is easily adjusted at the touch of a digital key to match the pool size and frequency of use.

Compact and water-resistant, **MINISALT®** is perfectly suitable for above-ground and in-ground pools with small installation area or filtering walls.

MINISALT® fits all filtration systems and pool surfaces. It is also easy to install and use.

What about pH regulation ?
Your ideal match:
The **JUST PH®** !!!

* In case of pH regulation installation

- **3 models:** one for pools reaching 30 cubic meters and another for 50 and 70 cubic meters in temperate climates. 25, 40 and 55 cubic meters only in hot climates
