Technical specifications

Key features

Strong, attractive and long-lasting pool liners will add to your fun in the sun! Combining unbeatable value and eye-catching designs, these heat-sealed liners can stand up to chemicals, solar rays and seasonal temperature peaks. Bring style to the pleasures of summer!

Hanging system

Overlap

This technique consists simply of folding the liner over the top of the wall – we suggest an overlap of 15 to 20 cm (6" to 8"). The liner is secured in place with the components moulded in white plastic and then the wall channels are reinstalled onto the top of the wall.

Vogue Hanging System

The hanging system is already integrated in the liner during the manufacturing process. Just hang the liner onto the wall, making sure it is well inserted. Ease of installation and a perfect fit every time.
