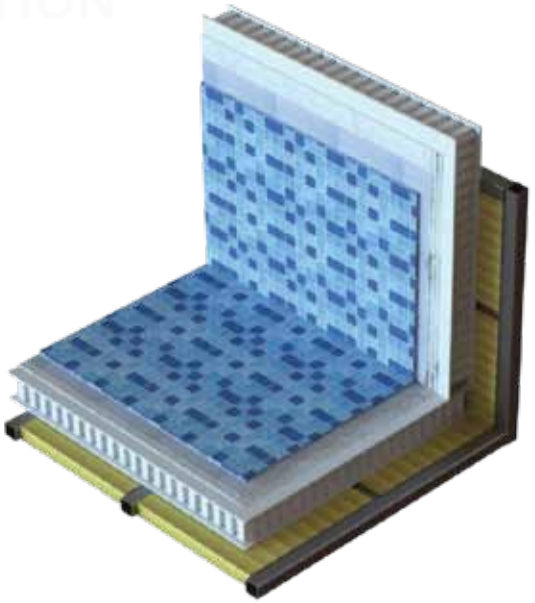
TILESTONE
POOLS AND SPAS
You bring the concept. We deliver it complete.

Why Tilestone?

Conceived by expert swimming pool designers, Tilestone deliver a luxury fully mosaic tiled pool to your door in 'one piece' dramatically reducing installation time! Manufactured in a controlled environment using the latest composite technology. All pools are tiled by expert professionals and all are supplied with light(s), inlets and suction fittings ready for connection.

Consisting of GRP lamination, Ceramic tiles, 75mm PU foam Insulation a high quality pool is created comparable to a gunite concrete structure. Luxe's 15,000 sqm manufacturing facility is capable of dealing with high volumes to meet project requirements, providing a complete turnkey service from consultation and design to mould creation through to manufacturing.

Choose your swimming pool or spa from an extensive range of shapes and sizes or contact our design team who can work with you to custom build to your exact requirements, turning your vision into reality.



- Two-piece option available
- Fully insulated to BStandard and in compliance with Part L
- Epoxy adhesive and grout used
- Far superior tile (longevity) appearance
- Non-staining
- Stronger than concrete
- 100% waterproof – no structural leaks
- No inclement weather delays
- No tiling expertise required
- No building delays
- No pool fittings to install on site
- No reliance on sub-contractors
- 100mm x 100m box frame carbon steel (Polyester coated)
- Polypropylene 50mm Honeycomb-base/ wall structure
- Interior: Polyester Resin (1 x layer), Vinyl Ester (3 x layers)
- 50mm Sprayed Pu Foam insulated to the BStandard/Part L
- Available in two-piece option, tiled or untiled.
- Pool finish: mosaic or large format tiles
- All pool finishes are applied using Epoxy Adhesive/Grout
- Wall fittings- 316L Stainless Steel or ABS available
- Weight with mosaic tile approx. 65kg per square metre.
- An expected minimum service life of 25 years.
- Manufacturers structural warranty 10 years tile warranty 5 years

Design Plan
Luxe will assist you in turning your designs into reality. We can work with your drawings and plans or provide concepts based on your ideas to achieve the desired result.

Drawings & Structural Calculations
To ensure everything is perfect with your design, our experts create full CAD drawings giving you all the dimensions you need to ensure everything will fit with precision. We can provide structural calculations for standard and bespoke design too.

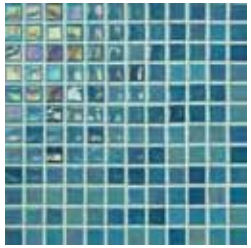
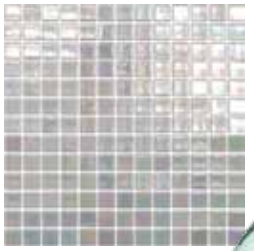
Finishes

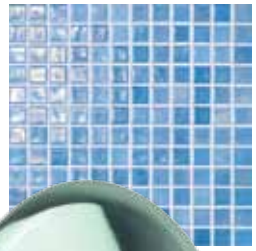
Choosing the tiled finish is one decision that ultimately has to come from you! There are an insurmountable range of different colours and designs manufactured worldwide. Therefore, Luxe have carefully selected and stocked a range of preferred tiles that are timeless in appearance and most commonly used for outdoor and indoor pools environments.

Discuss your colour and vision with your dealer and Luxe will propose a brand selection for you to choose from.

All Luxe pools are tiled using superior epoxy adhesive and grout (four times longer labour time compared to tiling a standard concrete pool) to either large format tiles or standard ceramic/glass type mosaics. Epoxy grout also ensures the pool remains stain-free in the future too. Below is our standard iridescent range of stocked tiles.

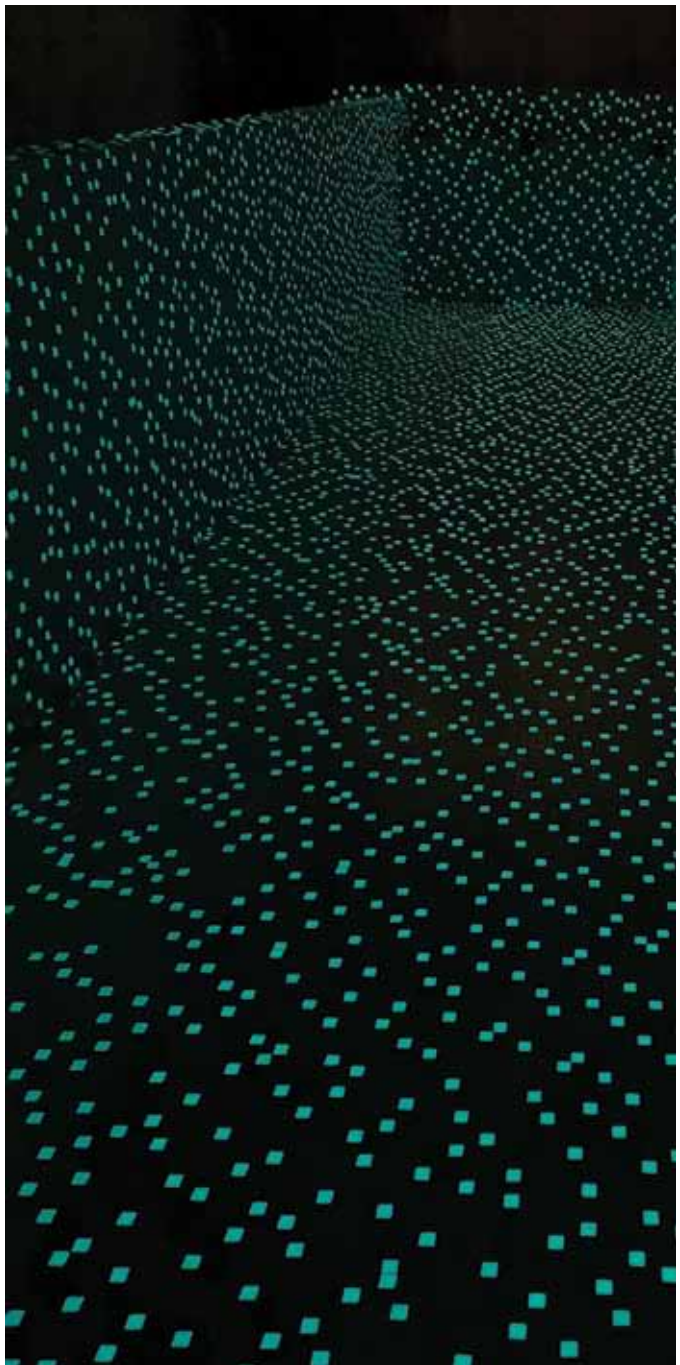






All pool fittings are supplied in 316L grade stainless steel. A number of alternative hydro stations, air geysers, swim jets & lights can also be incorporated into the design.

Luminous effect tiling available



Trainer pools incorporating Ultra-flow technology

The high-volume non-turbulent water flow is what distinguishes our pools from other swim spas and provides the best swim available anywhere. Utilising a custom designed propeller system, our swim current is wider than your body, deeper than your stroke, free of turbulence and bubbles and completely variable in speed.

Combining the beauty and strength of the tilestone pool Luxe have incorporated the 'Ultra-flow' technology to produce a realistic river smooth like current with variable speed. The 'Ultra-flow' can deliver up to 200 cubic metres of water per hour (normal 3hp swim jets produce 45 CBM.

Silent and reliable!
Using brushless motor technology the Ultra-flow operates quietly and efficiently.

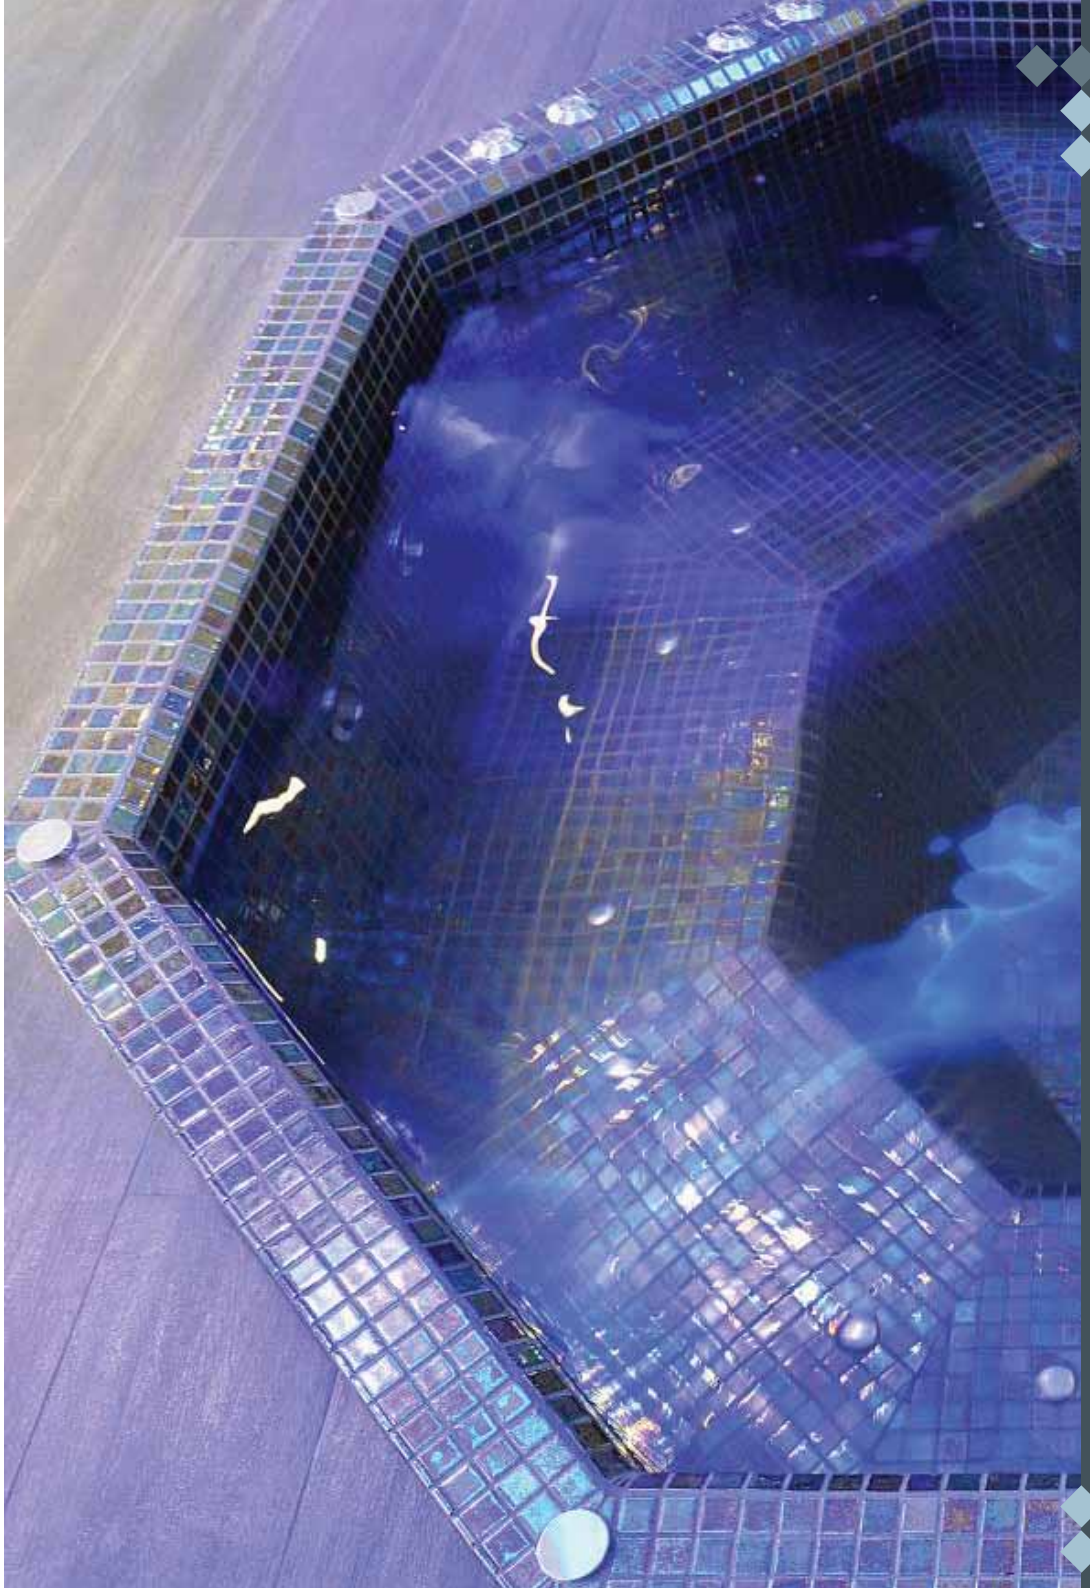
Standard Length 4 - 6m
Standard Width 2 - 4m
Bespoke size available – Yes

200 cbm flow-rate

Optional Spa massage stations & automatic cover housings available

Wellness and Hydrotherapy

At Luxe, we believe every hydrotherapy pool should be tailor-made to suit your needs. Above or belowground, massage stations, air therapy, glass windows are all options that can be accommodated for.



Automatic covers

Luxe are able to accommodate two types of automatic covers; Fabric Safety or PVC/ Polycarbonate Slatted Cover systems. Both covers are generally associated with indoor and outdoor pools and will prevent heat and evaporation loss. A number of in-built housings can be intergrated within the pool shell ensuring easy to install and leak-free systems.
